

# MIDIMODE

The young but well-known russian IDM project by Sergey “Duophonic” Baranov and Denis Basov demonstrates the sound which organically combines IDM, hip-hop, dubstep and breaks. The music of Midimode is not less experimental, but it’s clear rather for a wide range of the electronic music fans.

The first release "Midimusicbox EP" (November, 2009) came out on Homework Netlabel. Some tracks were taken into rotation of 16bit.fm (one of the biggest russian Internet-radiostations) and in a big variety of compilations.
